Senior Web Developer (Croatia)

Creating a great customer experience through web applications is core to Coinme's success. The Customer Experience team at Coinme is responsible for ensuring that our customers can utilize the different products offered by Coinme. Specifically, the role of a Senior Web Developer at Coinme is to lead by example, guiding less senior members of a team in the creation of awesome financial experiences on the web.

As a successful candidate, you will come from a technical background with hands-on experience in developing extensible architectures on the web, with demonstrated abilities in choosing architectures, creating web applications and websites, and working with backend services. You will be able to demonstrate that you have a passion for and are mission-driven with regards to creating a great customer experience. We want to see examples of your work on the web, with the ability to discuss what decisions you made to help make these web apps successful.

What You'll Be Working On

- Provide technical guidance.
- Design and deliver scalable and resilient code.
- Develop highly performant and scalable web apps using React and Typescript.
- Interact with Product and Design teams.
- Use and help guide API development. Create proof-of-concept implementations for new features and architectures.
- Present easy-to-understand web concepts to the team.
- Help create secure solutions on the web platform.
- Help create and maintain an amazing CI/CD pipeline, including unit tests and static analyses.
- Add and use instrumentation and logging to support data-informed decisions.
- Experience with Styled components.
- Experience with ThemeProvider.
- Experience using design systems.
- Experience building and publishing component libraries with NPM.
- Understanding of component composition practices, e.g. dumb / presentation components and smart / composed components.

What We're Looking For

- Bachelor's degree in Computer Science, Software Engineering, or equivalent experience.
- 4+ years of demonstrated experience in web development. Showing off web applications you have helped create is great!
- Strong Javascript fundamentals.
- Strong HTML / CSS fundamentals.

- Strong experience in Functional React, Redux or RTK, Typescript, Jest/Testing Library for unit tests, and Storybook.
- Experience in web architecture and functional programming.
- 2+ years of experience developing web applications using React and Typescript.
- Passion for creating solutions that help people manage their finances.
- Familiarity with basic concepts of user experience.

Not Required, But Nice to Have

- Experience with consumer-facing web applications.
- Experience working with CI/CD pipelines.
- Experience with Accessibility.
- Experience with micro-frontend architectures.
- Experience with i18next internationalization and localization.
- Experience with node.js / express.
- Experience working in a highly regulated industry with cryptocurrencies and the blockchain.
- Experience working with remote and geographically distributed teams.

Compensation and Benefits:
- Monthly Base Salary €2,300 - €4,000
- 100% Remote - work from the comfort of your home
- Health benefits package including options for 100% company-paid
- Generous Time Off
- Paid Holidays
- Great people!
- Friendly, non-competitive environment

Location:
This opportunity is for a full-time remote position for candidates residing in Croatia.

Travel
This position requires travel.
